Introduction

This template contains information and guidelines for submitting your abstract to the BioMedEng18 conference held on 6th-7th September, 2018 at Imperial College London.

Methods

The body of the abstract should be Arial font, size 11 pt, with single line-spacing. Please do not change the layout of the title, the authors and affiliations. Please do not change the margins, font or font size of the body text.

The presenting author should be underlined and bold. Please include in your abstract the following sections (or similar): Introduction, Methods, Results & Discussion, Conclusions, References and Acknowledgements.

Results & Discussion

Abstracts will be included in the conference booklet exactly as submitted.

Figure(s) and Table(s) are optional and should be included in the text without changing the margins. Font size of the legend should not be smaller than point 8. Please note that colour figures will be reduced to grayscale.

Therefore, authors are advised to submit grayscale figures. Abstracts that substantially deviate from these instructions cannot be accepted.

Conclusion

Only electronic submissions will be accepted. Please upload your abstract - **maximum 1 A4 page** in the correct layout and **high resolution PDF format** to the Abstract Submission portal at: <https://cmt3.research.microsoft.com/BioMedEng2018>

References (examples – use “First author *et al.*” if more than 3 authors, minimum font size 9pt)

Acknowledgments

We are grateful to the Wellcome Trust and EPSRC Medical Engineering Initiative and the Bioengineering Society for supporting this conference. **Please declare all possible conflicts of interests in this section.**

Please note:

Abstract submission deadline is **16th April, 2018.** Abstracts must not exceed one A4 page.
